

Do It Right Or Do It Over

A "junkyard" engine or transmission may seem like a bargain, but it's not a bargain if you and your family wind up regretting your purchase afterward. Why gamble on an **unproven engine or transmission**, with **unknown defects**, and an **unknown history**?

For over 70 years, JASPER Engines & Transmissions has provided the highest quality remanufactured products available. We pride ourselves on using the most thorough and advanced techniques in our industry and on providing unmatched customer service.

But you needn't take our word for it. Ask around. After all, we've done right by our customers since 1942.

Other OPTIONS... That Really AREN'T!

The "Like-New" Engine or Transmission from a Wrecked Vehicle

Unfortunately, even engines and transmissions with low miles can have hidden problems. And if you can find one for a vehicle that's less than 1-2 years old, an engine or transmission with only a few thousand miles on it will probably cost **close to a remanufactured engine or transmission**. Many "like-new" junkyard engines or transmissions carry a minimal 30-90 day warranty. It's still a roll of the dice.

A JASPER Fully Remanufactured Engine or Transmission is a Sure Thing!

When you purchase a fully remanufactured engine or transmission from JASPER Engines & Transmissions, you know **exactly** what you're getting - **peace of mind**.

JASPER remanufactured engines and transmissions are **live-run tested** with computer-aided equipment to **assure proper operating conditions** before they are shipped.

We Have The SOLUTION

AD-E06-86-92565 (REV. 4/13)

The Truth About JUNKYARD Engines and Transmissions.

"Junkyard" engines and transmissions are often steam cleaned before being offered for sale... but an engine or transmission that looks good on the outside may still have serious mechanical problems that you can't see - and lots of dirt inside.

Dirt is the enemy of any engine or transmission. Dirt, caused by poor maintenance, damages critical internal parts and leads to engine or transmission failure. Poor lubrication, due to infrequent oil changes or low fluid levels, causes wear and other surface imperfections that can lead to expensive engine or transmission component failures.

And if the vehicle from which the junkyard engine or transmission was pulled had been involved in an accident, what are the long-term effects on that engine or transmission? For example, the engines and transmissions of vehicles involved in rollover accidents may continue to run, even running wide open while upside down... starved of oil flow and incurring damage by the second. A head-on collision will almost always damage the cooling system, and if the engine or transmission continues to operate without coolant, damage due to overheating will result.

The fact is, you don't know what you're getting, and you can't know... unless you roll the dice and buy it.

Why Gamble on a JUNKYARD Engine or Transmission?

A JASPER Fully Remanufactured Engine or Transmission is a Sure Thing!

The Bad

The Good

With a Junkyard Engine or Transmission, You're Rolling the Dice.

Installing a junkyard engine or transmission is risky. You don't know the history or condition - or how long you can rely on it.

JASPER Remanufactured Engines & Transmissions Are Your Affordable, Sure-Bet Solutions.

JASPER Remanufactured Engines and Transmissions:

- Receive a standard set of new parts and are machined to exacting tolerances
- Are updated to eliminate original equipment design flaws
- Are available quickly through a nationwide distribution network
- Are live-run tested for reliability
- Offer an available premium service plan for even greater value to you
